

SAID SALAHOUELHADJ

Operational Research & Data Systems Specialist | Executive Project Lead

0781493829 | salahouelhadjsaid@gmail.com | Bordj El Kiffan, Algiers | LinkedIn

Professional Profile

Operational Research student at USTHB combining mathematical optimization, algorithmic thinking, and applied analytics with hands-on industrial and commercial execution. Academic training in linear programming, graph theory, statistics, stochastic processes, and combinatorial optimization provides a strong quantitative foundation for advanced study in Big Data and Data Engineering. Experienced in applying Python-based optimization and project-planning methods to industrial problems, while using quantitative performance analysis in digital advertising environments. This combination connects mathematical modeling with operational data and real-world decision systems. Alongside technical work, demonstrated executive leadership through university and community organizations, including governance, external relations, institutional representation, sponsorship development, and large-scale project execution.

Executive Leadership & High-Impact Projects

President | Club Rabita of Berriane Students

Present

Organizational Governance

Strategy, Operations & Resource Allocation

- Govern organizational strategy and executive-board decision making across community activities and student initiatives.
- Direct resource allocation, operational priorities, and execution of organizational programs.
- Coordinate teams and stakeholders while maintaining accountability for organizational outcomes.

Head of External Relations | Project Initiative Club, USTHB

Present

Institutional & Corporate Relations

Negotiation, Partnerships & Representation

- Lead institutional and corporate outreach for major university initiatives and external partnerships.
- Negotiate with companies, institutions, and senior stakeholders; manage high-level external communication.
- Support sponsorship acquisition and strategic partner development for large-scale student projects.

Project Chief & Operations Lead | Career Summit '26

Project Initiative Club, USTHB

University Job Fair | Strategic Project Execution

- Spearheaded execution of USTHB's inaugural university job fair, coordinating institutional, operational, and external-partner requirements.
- Managed project execution involving university leadership, corporate representatives, student participants, and organizational teams.
- Coordinated institutional protocol and stakeholder communication, including hosting the University Rector and participating enterprise partners.

Project Chief & Program Architect | FormaCamp 2025

Project Initiative Club, USTHB

13-Subject Technical E-Commerce Program | Curriculum Architecture

- Architected a 13-subject technical E-Commerce training program from curriculum structure through implementation.
- Defined program content around practical technical and commercial competencies and recruited national industry professionals as instructors.
- Managed planning, speaker coordination, stakeholder relationships, and program delivery.

Professional Experience

Industrial Project Planning Intern | IRMA Global Services
Optimization & Project Planning

2026 – Present
Python, PuLP/CBC, PERT/CPM

- Applied project-planning methodologies and Python-based optimization tools to industrial scheduling and resource-allocation problems.
- Formulated and solved constrained optimization models using **PuLP/CBC** to support project planning.
- Applied **PERT/CPM** to analyze dependencies, critical activities, schedule risks, and bottlenecks.
- Produced analytical diagrams, charts, and reports supporting engineering and planning decisions.

Media Buyer / Marketing Data Analyst | lazagroup
Performance Analytics

July 2024 – Present
Paid Acquisition, Funnel Analysis & Budget Optimization

- Execute and optimize paid digital advertising campaigns across performance-oriented acquisition channels.
- Analyze campaign data to evaluate spending efficiency, conversion behavior, and funnel performance.
- Use quantitative performance indicators to guide campaign adjustments and budget allocation.
- Build and iterate campaign structures and creatives based on observed market response.

Operations & Logistics | SARL SDS & Jumia
Operations

2020 – 2024
Inventory, Suppliers & Dispatch

- Managed workflows spanning inventory, orders, supplier coordination, payments, and logistics; supported high-volume dispatch and time-sensitive operations.

Education

Bachelor in Operational Research – 3rd Year | USTHB
University of Science and Technology Houari Boumediene

2022 – Present
Bordj El Kiffan, Algiers

Relevant coursework: Linear Programming / PLNE; Graph Theory; Applied Statistics; Stochastic Processes; Combinatorial Optimization; Mathematical Modeling; Optimization and Decision Systems.

High School Diploma in Mathematics – 16.45/20 | Lycée Saad Dahleb
Mathematics Track

2019 – 2021
Algiers

Technical & Management Skills

Technical / Analytical	Python; SQL; Excel; Graph Theory; Applied Statistics	Leadership / Management	Strategic Planning; Executive Decision-Making; Team Leadership; Stakeholder Management
Data & Optimization	Mathematical Modeling; Linear Programming / PLNE; PuLP / CBC; CPM / PERT; Combinatorial Optimization	External Relations	Negotiation; Institutional Communication; Partnership Development; Project Execution
Performance Analytics	Campaign Analytics; Conversion Funnels; Budget Optimization; Operational Analysis	Operations	Resource Allocation; Scheduling; Inventory; Supplier Coordination
