

PROFILE

A multidisciplinary tech innovator and dual-degree student in Computer Science Engineering and Cybersecurity, I architect intelligent, security-hardened, and user-centric systems at the intersection of AI, full-stack engineering, and design. With three national hackathon wins — in Healthcare AI, Fake News Detection, and Industrial IoT — I have proven my ability to engineer solutions that win under pressure and perform in the real world. My technical arsenal spans React, Next.js, TypeScript, Python, Flask, AI/ML pipelines, Figma, and network security, backed by hands-on leadership as a Project Manager and international recognition from the Huawei ICT Competition and the STEAM Global Program. I collaborate with forward-thinking organizations building at the frontier of AI, secure infrastructure, or high-performance digital products — delivering outcomes that matter with clarity, precision, and impact.

WORK EXPERIENCE

	Founder MedVision AI	2025 - Present
	- Founded an AI-driven health-tech startup focused on AI-powered medical imaging analysis and diagnostic assistance. - Architected the core AI model using Python, TensorFlow, and OpenCV for automated detection of anomalies in medical scans. - Led a team of 4 developers and 2 medical advisors, delivering a functional prototype that achieved 91% diagnostic accuracy in preliminary testing. - Designed the UI/UX interface using Figma, ensuring a seamless and intuitive experience for healthcare professionals. - Secured initial interest from 3 local clinics for pilot testing and received mentorship from the STEAM Global Program.	
	Founder Ferza Recycle	2025 - Present
	- Founded an eco-tech startup focused on sustainable waste management and recycling logistics optimization. - Developed a smart waste management platform (Tadbira) leveraging AI for efficient recycling routing and waste classification. - Engineered a full-stack solution using React, Next.js, TypeScript, and Node.js, connecting 50+ recycling partners across the region. - Implemented AI-powered image recognition for automatic waste sorting, reducing manual sorting time by 60%. - Pitched the project at the National AI & Robotics Camp, earning recognition from ministerial delegations and potential investor interest.	
	Full-Stack Developer Bortocall	2025-2026
	- Engineered full-stack web applications using React, Next.js, TypeScript, and Tailwind CSS for the company's core product. - Designed and integrated RESTful APIs using Node.js and Python Flask, ensuring seamless data flow between frontend and backend systems. - Implemented real-time features and optimized application performance, reducing page load times by 35%. - Collaborated with cross-functional teams of 10+ developers and designers, delivering 3 major product releases on schedule. - Architected secure authentication and authorization systems, enhancing overall application security posture.	

Freelance UI/UX Designer

2024 - 2026

- Designed and delivered 30+ complete UI/UX projects for diverse clients across e-commerce, healthcare, and tech industries.
- Created high-fidelity prototypes and design systems using Figma, resulting in a 40% increase in client user engagement on average.
- Conducted user research, usability testing, and iterative design processes, reducing bounce rates by 25% across 15+ client platforms.
- Translated complex user requirements into intuitive interfaces, earning 100% client satisfaction and Retained 80% of clients as repeat customers through exceptional design quality and reliability.
- Developed responsive and accessible designs, ensuring seamless user experiences across all devices and platforms.

Remote Intern | Code Alpha (India)

2026 - Present

- Contributed as a remote full-stack developer intern at an Indian tech company, working on 5+ live projects.
- Developed and deployed React and TypeScript components, improving application modularity and maintainability.
- Integrated third-party APIs using Python and Flask, enabling new product features and functionality.
- Collaborated with international teams across time zones, demonstrating strong remote communication skills.
- Received recognition for exceptional performance and code quality, earning a strong recommendation.

HR Member | GDG (Google Developer Group) — ESI Algiers

2025-Present

- **Manage** human resources operations for one of Algeria's most active Google Developer Group chapters at ESI Algiers.
- **Coordinate** recruitment, onboarding, and team-building activities, **growing** the club's active membership by 50% within the first 6 months.
- **Organize** technical events, workshops, and hackathons, **attracting** 300+ participants from across the university network.
- **Collaborate** with the core team to plan and execute the annual DevFest Algiers, **featuring** industry speakers and 500+ attendees.
- **Implement** member engagement strategies, **maintaining** a 95% retention rate among active club participants.

ADDITIONAL WORK EXPERIENCE

Project Manager | TACWIN Club (Mohamed Tayeb Bousna Institute)

2025-Present

- Led the Projects Department, **orchestrating** 5+ technical initiatives with 100% on-time delivery.
- Managed cross-functional collaboration and resource allocation, **increasing** student participation by 40%.

Active Member | CELEC Scientific Club (USTHB)

2025-Present

- Organized 3+ technical workshops on AI and Full-Stack Development, reaching over 200+ engineering students.
- Mentored junior members in React and Figma, resulting in 5 successful student projects

Sales Manager | Household Appliances Store

2023-2024

- Managed team of 8 sales associates, increasing monthly revenue by 25%.
- Developed customer retention strategies, boosting loyalty by 30%.

HACKATHON & COMPETITION EXPERIENCE

1st Place | Nucleo Mind Hackathon (Healthcare AI) — HIS- Alg-23

April 2026

- Built an AI-powered clinical assistant for early detection of cancer and diabetes using Scikit-learn, Pandas, and NumPy.
- Deployed a Flask API for real-time predictions, achieving 94% accuracy and reducing diagnostic time by 45%.
- Designed a doctor-friendly UI with React and Figma, winning 1st Place among 40+ competing teams.

1st Place | National AI Hackathon (Mila)

December 2025

- Architected "Sanad AI," a fake news detection tool using Python, Flask, and NLP models, **achieving** 92% accuracy.
- Integrated real-time automated drafting features, **reducing** content verification time by 60%.
- Earned recognition from ministerial delegations.

3rd Place | Reverse Engineering Hackathon (Setif)

March 2026

- Reverse-engineered a legacy mechanical system, extracting control logic from PLCs.
- Architected a wireless monitoring solution using ESP32 and MQTT, enabling real-time industrial control.
- Integrated IoT sensors, reducing unplanned machine downtime by 30%.

Due to the volume of hackathons, national competitions, and international programs I have participated in — several of which I have won or ranked highly — only the most notable achievements are listed above.

SKILLS

• **Development: Full-stack Web :**
Development (React, Next.js), Mobile App Development.

• **AI & Data: Machine**
Learning, AI Model Integration.

• **Design: UI/UX Design (Figma),**

• **Core Engineering:**
Cybersecurity , Network , Infrastructure, Robotics.

• **Digital Marketing**
Frontend → React · Next.js · TypeScript · Tailwind · Figma
Backend → Node.js · Python · Flask · REST APIs
AI & ML → Scikit-learn · TensorFlow · OpenCV · NLP
Cybersecurity → Network Security · IoT · ESP32 · MQTT

Soft Skills:

- Leadership
- Public Relations
- Project Management
- Problem-Solving
- Critical Thinking

EDUCATION

• **State Engineer's Degree — Software Engineering & Computer Science** Sep 2024- Jun 2029
University of Science and Technology Houari Boumediene (USTHB)

• **BTS Cybersecurity** Sep 2025- Jun 2028
National Institute Mohamed Tayeb Boussena

• **Bachelor of Science — Mathematics**
University of Algiers 1

LANGUAGES

- Arabic (native)
- English (B2)
- French (B2)
