SUMMARY

I am very committed to building my experience on lived experiences and working to find solutions according to the lived situation and the active category. I work to strengthen my abilities by taking advantage of available opportunities for training and development, and by taking the initiative to implement what I have learned, whether through initiatives or development projects. I have a strong desire to learn and the ability to learn new specialization, especially those related to management

WORK EXPERIENCE

public sector

In salah, Algeria

state Engineer in technical and urban management

May 2022 - Present

Through this specialization, I work on managing the city and monitoring its various projects, ensuring their legality. I also work extensively with citizens by responding to their needs, facilitating administrative procedures, and reviewing and guiding development plans.

INTERNSHIP

Fellow

international strategic management

Detroit , United States

Apr 2026 - May 2026

Through the professional fellowship program, I gained practical experience in entrepreneurship and entrepreneurship training, and I participated in various company activities by preparing for training activities and following up on various company operations.
