

# BOUCHERA BELLIL

ENGINEER – STATISTICS | ECONOMETRICS | DATA SCIENCE

## PROFESSIONAL SUMMARY

State Engineer in Applied Mathematics specialized in Data Science, Statistics, and Econometrics, with expertise in statistical modeling, machine learning, predictive analytics, and large-scale data analysis. Experienced in developing data-driven solutions, forecasting models, and quantitative methodologies for complex real-world problems using Python and R. Skilled in time-series analysis and stochastic modeling with strong abilities in translating analytical results into decision-support tools. Seeking to apply statistics and data science to telecommunications problems.

## CONTACT

Phone: +213-556 97 11 74

Email: boucherabellil@gmail.com

## EDUCATION

### National Higher School of Mathematics (NHSM) | 2021- 2026

Sidi Abdellah Science and Technology Pole - Algiers

State Engineer in Applied Mathematics: Data Science, Statistics and Econometrics

### Baccalaureat - 2021

Mathematics - High Honors (17.06)

## THESIS

### Machine Learning and Predictive Analytics for Large-Scale Climate Data

- Developed predictive analytics solutions for large-scale data processing and forecasting.
- Performed data cleaning, transformation, feature engineering, and exploratory analysis on complex datasets.
- Applied statistical and machine learning methods to uncover patterns, generate insights, and support data-driven decision-making.
- Evaluated model performance using quantitative metrics and structured decision frameworks.
- Built robust analytical pipelines to improve prediction reliability and operational efficiency.
- Automated data analysis, visualization, and reporting workflows using Python

## EXPERIENCE

### Internship | Office National de Météorologie (ONM) - Oran | 2025

- Processed and analyzed large climate and meteorological time-series datasets.
- Developed predictive and forecasting models using statistical and machine learning approaches.
- Performed data preprocessing, feature extraction, and exploratory statistical analysis.
- Produced visualizations and technical reports to support operational and strategic decision-making.

### Internship | El Djazaïr El Moutahida Family Takaful Insurance - Algiers | 2024

The Technical Department

- Applied statistical methods and predictive models for actuarial and risk analysis.
- Processed, cleaned, and analyzed client datasets using Python and R.
- Contributed to building dashboards for actuarial data visualization

## SKILLS

- Programming: Python, R, MATLAB
- Machine Learning, Statistical Analysis, stochastic simulations, Neural Networks, Predictive Analytics, Data Mining, Time-Series Analysis, Econometrics, Probability.
- Tools: Latex, Excel, Canva, PowerPoint, VS Code
- Analytical thinking, quantitative problem solving, excellent technical reporting and presentation design, rigorous documentation, teamwork, time management, and adaptability.
- Driving License: B

## **PROJECTS**

- Healthcare Risk Prediction Using Linear Regression
- Nonparametric Density Estimation and Pattern Recognition using k-NN Methods

## **LANGUAGES**

- Arabic: Native
- English: Advanced
- French: Advanced
- Korean: Intermediate
