

ILYES KOURDES

Bir El Ater, Algeria | 0657889012 | kourdesilyes7@gmail.com | linkedin.com/in/ilyes-kourdes-607b96349

PROFESSIONAL SUMMARY

Master 1 student in Electrotechnics specializing in Renewable Energy, progressing to Master 2 with expected graduation in 2027. Bachelor's degree in Applied Renewable Energies with practical experience in architectural electrical installations, solar photovoltaic systems, industrial equipment, and oil and gas operations. Two years of freelance electrical work covering wiring, installation, electrical diagrams, solar PV schematics, installation, and troubleshooting. Field experience at Sonatrach and Somiphos.

EDUCATION

Master's Degree in Electrotechnics – Renewable Energy — University of Ouargla Kasdi Merbah, Algeria | 2025–Present | Master 2 expected 2027

Bachelor's Degree in Applied Renewable Energies — University of Ouargla Kasdi Merbah, Algeria | 2022–2025 | Science and Technology

PROFESSIONAL EXPERIENCE

Freelance Electrical Technician – Architectural Electrical Installations | Algeria | 2 Years

- Performed residential and architectural electrical installations and wiring.
- Installed electrical circuits, switches, sockets, lighting systems, and distribution components.
- Read and interpreted electrical diagrams, wiring schematics, and solar photovoltaic (PV) system diagrams.
- Installed and connected solar photovoltaic components and basic PV systems.
- Performed electrical testing, troubleshooting, and basic fault identification.

Intern – Sonatrach, Hassi Berkine, Ouargla | Oil and Gas Operations | 8 Days

- Observed oil production, gas storage, field operations, and industrial maintenance activities.
- Gained practical exposure to electric motors, industrial pumps, equipment troubleshooting, and repairs.

Intern – Somiphos, Djebel Onk, Bir El Ater | Phosphate Production | 8 Days

- Observed phosphate production and industrial electrical maintenance operations.
- Observed repair of electrical panels affected by motor vibrations and learned about servo motors and sensors.

FIELD EXPERIENCE

Solar Energy Field Visits – El Hadjira and Ghardaia, Algeria

- Visited solar photovoltaic electricity production facilities and observed solar panel systems, electrical production processes, and PV infrastructure.

TECHNICAL SKILLS

Renewable Energy Systems • Solar PV Systems • Solar Panel Installation • Architectural Electrical Installations • Electrical Wiring • Electrical Diagrams & Schematics • Solar PV Diagrams • Electrical Troubleshooting • Electrotechnics • Electrical Maintenance • Industrial Electrical Systems • Electric Motors • Industrial Pumps • Electrical Panels • Servo Motors • Sensors & Instrumentation • Energy Conversion

PROFESSIONAL SKILLS

Problem Solving • Teamwork • Independent Work • Field Work • Equipment Troubleshooting • Adaptability • Attention to Detail • Technical Observation

LANGUAGES

Arabic: Native • **English:** Good • **French:** Intermediate

CAREER INTERESTS

Renewable Energy • Solar Energy • Electrical Engineering • Electrotechnics • Architectural Electrical Installations • Solar PV Installation • Industrial Maintenance • Oil and Gas • Energy Production
