EDUCATION

•State Engineer Degree in Electronics

Sept. 2023 – June 2026

École Nationale Polytechnique d'Alger (ENP), Algiers

GPA: 3.0/4.0

- Coursework: analog/digital electronics, instrumentation, microprocessors, embedded systems, RF/microwave engineering, control systems, power electronics and communication systems.

•Preparatory Classes – Science and Technology

Sept. 2021 – June 2023

École Nationale Polytechnique d'Alger (ENP), Algiers

GPA: 3.0/4.0

- Mathematics, physics and engineering sciences, including mechanics, thermodynamics and strength of materials. Ranked 22nd/305 in the national entrance competition for the Grandes Écoles.

ACADEMIC PROJECTS

•Adaptive Beamforming & Spectrum Sensing

Final Year Project (PFE) – SDR + GNU Radio + Linux

2025 – 2026

- Implemented CFAR-based spectrum sensing and adaptive beamforming for real-time RF target detection and tracking using C++/Python, GNU Radio and SDR hardware.
- Developed an interactive Linux GUI integrated with GNU Radio for real-time monitoring and visualization, using ZMQ for inter-process communication.

•GSM / 3G / LTE RF System

Engineering seminar – RF jammer design and implementation

- Designed and tested an RF jammer, including system integration, measurements and functional testing.

EXPERIENCE

•Engineering Intern

Sept. – Oct. 2025

Air Algérie – Aircraft Maintenance & Repair Division (DMRA)

Algiers, Algeria

- Inspected, tested and repaired sensitive avionics instrumentation including torque indicators, altimeters, accelerometers, artificial horizons and RMI systems.
- Performed basic troubleshooting and functional checks on equipment from Thales, Sagem, Safran and Intertechnique in a safety-critical aircraft maintenance environment.

•Intern – Control Tower

Jan. 2024

Établissement National de la Navigation Aérienne (ENNA)

Algiers, Algeria

- Studied and operated VOR, ILS, DME, radar and NDB navigation and surveillance systems in an operational aviation environment.

•Immersion Intern

Dec. 2023 – Jan. 2024

Alger Metro – Bach-Jarrah Maintenance Base

Algiers, Algeria

- Exposure to CMMS, LV/MV intervention procedures, SCADA/CBTC systems, TETRA radiotelephony and industrial systems in a maintenance environment.

TECHNICAL SKILLS AND INTERESTS

Maintenance & Instrumentation: Equipment inspection, fault diagnosis, troubleshooting, repair, measurement & testing, instrumentation

Electrical & Control Systems: Analog/digital electronics, electrical systems, control systems, SCADA, embedded systems

Maintenance Systems: CMMS/GMAO, maintenance procedures, equipment testing and functional checks

Programming: C/C++, Embedded C, Python, MATLAB, VHDL

Software: OrCAD, KiCad, LTspice, Multisim, ADS, Vivado, Vitis, GNU Radio, Wireshark

Languages: French (TCF C2), Arabic (fluent), English (working proficiency, EF SET B2), Kabyle (native)

Soft Skills: Problem-solving, independence, responsibility, teamwork, communication

POSITIONS OF RESPONSIBILITY

•Conductor, Cultural Section – Club des Activités Polyvalentes, ENP

2023 – 2024

- Led and coordinated the cultural section's activities and events.

•Organizing Member, Défi des Grandes Écoles & Charity Trip (CAP, ENP)

2023 – 2024

- Co-organized inter-school events and a nationwide charity relief drive.
