Mahelma

Language

- Arabic (C2)
- English (C1)
- French (B2)
- Italian (A2)

Core Skills

- Scientific & technical research
- Critical and analytical thinking
- Science communication
- Oral presentation
- Content creation
- Team collaboration
- Leadership & initiative
- Problem-solving
- Information synthesis
- Multilingual communication

About Me

Engineering student with a background in English and communication, passionate about science, technology, innovation, and learning across disciplines. My engineering studies have developed my analytical thinking and problem-solving skills, while my academic background in English has strengthened my communication, research, and presentation abilities. I also have experience creating educational and science-related content for social media and working in student communities. I am particularly interested in contributing to collaborative projects where technical ideas need to be researched, understood, communicated, and turned into engaging solutions.

Education

Engineering Studies

École Nationale Supérieure des Travaux Publics (ENSTP) Francis Jeanson | [2024–Present]

- Engineering curriculum covering mathematics, physics, chemistry, computer science, and other technical disciplines.
- Developed analytical thinking, problem-solving, and quantitative reasoning through technical coursework.
- Experience working with multidisciplinary scientific and engineering concepts.

Bachelor's Degree in English

University Alger 02 – Abou El Kacem Saadallah | 2020–2023

- Developed strong written and oral communication, research, critical thinking, and presentation skills.
- Studied language, communication, and intercultural interaction.

Diploma in Emotional Intelligence

EDRAAK Platform | 2023

Activities

- Student Clubs: Participated in the scientific club (LTP), specifically the IT department, including video editing.
- Content Creation: Create university-life vlogs and short-form speaking content; research and present topics across psychology, physics, game theory, and economics.
