- English – Good

Ideathon 2025/2026

The Micro Club Ideathon is an immersive integration event where new members dive into the club's collaborative culture through a concrete creative challenge

The Ideathon challenges are designed to be stimulating, interactive, and full of opportunities for creative thinking. Each task encourages teams to experiment, brainstorm, and develop practical solutions to real-world problems. From designing innovative concepts to tackling unexpected twists, every challenge provides an engaging experience that puts your collaboration and problem-solving skills to the test.

FrameLab

Multimedia bootcamp

Achieving the 1st place in the teams challenges and the 7th in the individual phase

Individual Phase Leaderboard

Rank	Name	Challenges	Score
1st	Aouneseghir Chihebeddine	4	155
2nd	Bouaziz Ismail	4	126
3rd	Anes Benname	3	120
4th	Fayçal Madaci	3	117
5th	Malak Nour Bouchemla	2	91
6th	Touazi Mohamed Amin	2	82
7th	Azzouz Tasnim Baya	3	76
7th	Merazga Yasmine	2	76
9th	Megrouz Abderrahim	2	75
10th	Dob Serine	2	73

Framelab is the first ever multimedia bootcamp! As part of the learning and integration season multi members got to experience intensive workshops and challenges we had over 90 participants in the individual phase! And 9 teams in the groupe phase

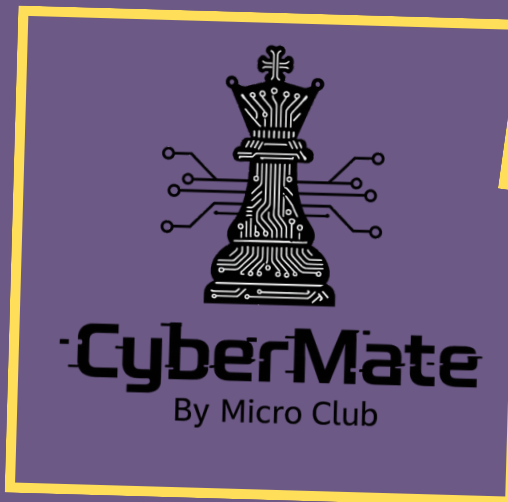

Hackops

4th edition

Both participate with the idea of "CyberMate": where chess strategy meets cybersecurity intelligence. Over three intense days, you will face technical CTF challenges while sharpening your tactical thinking through checkmate puzzles. This is where logic meets pressure and precision defeats chaos. You're not here just to play, but to think deeper, move smarter, and outmaneuver every challenge on your own.

I was also multimedia organizer, by capturing moments of the event the day of pitching

HackOps is an internal hackathon organized by the Micro Club that focuses on event organization and project planning. It brings together teams of members who work on creating an event idea and preparing all the necessary documents to make it happen. Throughout the process, participants are guided by mentors and gain hands-on experience in logistics, management, and teamwork, while also discovering how to turn their ideas into real and achievable projects

MCTF

5th Edition

I was responsible for photography and videography, capturing the key moments, atmosphere, and highlights of the competition while contributing to the event's visual storytelling and media coverage.

MCTF (Micro Club Capture The Flag) is an external cybersecurity event organized by Micro Club, designed for CTF players and cybersecurity enthusiasts. Participants compete individually or in teams to solve a series of security challenges.

The event brings together CTF players from outside Micro Club, creating a competitive environment where participants can test their technical skills, learn from other cybersecurity enthusiasts, and develop practical problem-solving abilities.

Brandiha

1st Edition

As a Staff member on the first day of Brandiha, I helped with the event's overall organization and coordination, ensuring everything ran smoothly. For the following three days, I worked as a Multimedia Organizer, handling photography and videography to capture the challenges, teamwork, and key moments throughout the event.

Brandiha is an internal Micro Club event that brings together four departments – Marketing, Multimedia, Design, and Communication – in a four-day creative challenge. Throughout the event, participants collaborate and compete through different challenges that test their creativity, teamwork, communication, and content creation skills, creating a dynamic environment where the four departments work together to bring ideas to life.

Hackiwha

3rd Edition

our solution was "Stapler" an Ai powered marketing and branding intelligent platform designed to help founders , startups , agencies .. to create high performance digital experience

HACKIWhA 3.0 is Micro Club's internal hackathon, a three day innovation challenge where participants come together in teams to design, build, and present fully functional tech solutions from scratch.

Throughout the event, participants combine multiple software development skills to transform ideas into real-world applications under tight deadlines.
