

SABRINE ZEMIK

Rouiba, Algiers, Algeria | +213 775 699 720 | zemiksabrine@gmail.com | linkedin.com/in/sabrine-zemik-708a41253

PROFESSIONAL SUMMARY

Early-career marine ecologist with experience in ecological field surveys, marine biodiversity monitoring, and environmental awareness initiatives. Combines scientific research experience with strong communication skills and a commitment to conservation. Interested in supporting projects that bridge research, environmental management, and community engagement to protect marine ecosystems

EDUCATION

Master's Degree, Biological Oceanography and Marine Environment | USTHB, Algeria | 2024 - 2026

Final average: 16.95/20. Ranked 1st in cohort. Dissertation grade: 18/20.

Bachelor's Degree, Biology and Ecology of Aquatic Environments | USTHB, Algeria | 2021 - 2024

Final average: 12.84/20. Ranked 6th in cohort.

RESEARCH & FIELD EXPERIENCE

Master's Researcher | USTHB | January - June 2026

- Assessed biological colonization and community structure on a storm-damaged artificial reef in the Bay of El Djamilia, Algiers.
- Performed monthly SCUBA-based surveys (belt transects, point counts, photographic quadrats), documenting 93 species across three field campaigns
- Calculated ecological diversity indices (Shannon-Wiener, evenness, dominance) using Excel and Python; mapped survey sites in QGIS and analyzed benthic cover in PhotoQuad
- Recorded a 7.0% to 30.2% increase in invasive algal cover (*Rugulopteryx okamurae*) between campaigns, providing field observations relevant to Mediterranean biological invasion monitoring

PROFESSIONAL EXPERIENCE

Intern, Macrophyte & Microphyte Laboratory Research | HUPE | July 2025

- Identified marine micro- and macrophytes using microscopy-based laboratory techniques

Intern, Fisheries Operations & Port Activity | Port of Tamentfoust | June 2025

- Observed fisheries landing operations and gained practical insight into port logistics and fisheries management practices

Intern, Pisciculture Training | INSPA | May 2025

- Completed a three-day introductory training on floating-cage marine aquaculture, covering species biology, feeding practices, and cage systems.

Intern, Water Treatment & Quality Analysis | SEAAL | July - August 2022

- Observed water treatment processes and quality control procedures

Intern, Coastal Environment Monitoring | Commissariat National du Littoral (CNL) | July 2022

- Monitored coastal water quality and pollution indicators; supported public awareness campaigns on marine pollution

PROJECTS

Reefinity – Sustainable Development Hackathon | Project National Sustainable Development Hackathon 2.0

University of Oran 2 Mohamed Ben Ahmed | May 2025

- Selected to compete in a national sustainable development hackathon bringing together 14 multidisciplinary teams from universities across Algeria.
- Co-developed an eco-friendly artificial reef concept using recycled materials to support habitat restoration and sustainable coastal tourism
- Designed a preliminary business model and sustainability strategy for the proposed solution.
- Delivered a three-minute project pitch to a multidisciplinary evaluation panel under strict time constraints.

- Collaborated intensively in a fast-paced team environment to transform an initial concept into a complete project within three days.

SKILLS

Software: QGIS, PhotoQuad, Microsoft Excel, Python, R, FISAT, STATISTICA, Microsoft Word/PowerPoint, Zotero
Field & Lab Techniques: SCUBA survey methods, species identification, water quality monitoring, microscopy, aquaculture techniques

Research: Data Management, Scientific Writing, Ecological data Analysis, Scientific Reporting, Literature Review.

Certifications: Scuba Diving Certification Level P1 (Recifs Club, 2024).

LANGUAGES

Arabic: Native | English: Fluent (C2, EF SET 72) | French: Intermediate (Academic proficiency-Degree completed in French)

ADDITIONAL TRAINING

Youth Leadership Training on Ocean Climate Action (Upcoming – Selected Participant) | October 2026

Observing Marine Ecosystem Structure and Function: From Microbial Communities to Fisheries and Human Health (In Progress) | International online training | July–September 2026

IOI Ocean Academy Program, International Ocean Institute Tunisia (Dec 2025 - Jan 2026)

Copernicus Hubs Essentials, Earth Observation & Remote Sensing (Sep 2025)

VOLUNTEER EXPERIENCE

Volunteer – Ecological Monitoring Program (*Ongoing*)

National Coastal Conservation Agency (CNL), Tipaza, Algeria | July–September 2026

- Participate in marine biodiversity monitoring within a protected coastal ecosystem.
- Conduct snorkeling-based ecological surveys alongside CNL environmental specialists.
- Assist with species identification, ecological observations, and field data collection.
- Contribute to long-term ecosystem monitoring supporting coastal conservation initiatives.

Marine Conservation Volunteer

Recifs Diving Club, Tamentfoust, Algeria | 2024–2025

- Assisted in organizing scientific and environmental outreach events promoting environmental sustainability
- Delivered educational presentations on marine biodiversity and ocean conservation
- Supported collaborative activities between scientists, divers, and local stakeholders during conservation initiatives.

Environmental Conservation Volunteer

Various Coastal Clean-up Initiatives | Algeria | Ongoing

- Participate regularly in coastal and beach clean-up campaigns aimed at reducing marine litter and protecting coastal habitats.
- Promote environmental stewardship and community engagement through local conservation initiative

RESEARCH INTERESTS

Marine ecology, citizen science, ecosystem restoration, marine biodiversity conservation, artificial reefs, Mediterranean ecosystems, climate change, sustainable blue economy, marine wildlife conservation, underwater ecological monitoring, marine biology.
