PROFILE

Cybersecurity engineering student specializing in web and API application security, with hands-on professional experience performing penetration testing and security assessments. Experienced in authentication, authorization, session management, multi-tenant isolation, business-logic testing, reconnaissance, vulnerability research and technical security reporting. Combines offensive-security expertise with software-development experience in Go, Python, Django and REST APIs.

EXPERIENCE

Cybeares

Hydra, Algiers

Application Security/ R&D Intern

Jul 2026 – Sep 2026

- Performed OWASP WSTG-aligned web and API security assessments on enterprise cybersecurity platforms, focusing on authentication, authorization, session management, and multi-tenant isolation
- Conducted reconnaissance and attack-surface mapping to identify exposed endpoints, parameters, and assets
- Tested vulnerabilities and business-logic flaws through manual HTTP/HTTPS traffic interception and manipulation using Caido
- Automated security testing workflows using Nuclei and custom scripts; analyzed JavaScript bundles with jsluice, xnLinkFinder, and TruffleHog to identify hidden endpoints and exposed secrets
- Reported 10+ bugs and security findings with reproducible steps, impact analysis, and actionable remediation recommendations for development teams

Cybeares

Hydra, Algiers

Research & Development Intern

Feb 2026 – May 2026

- Completed training in GRC (Governance, Risk & Compliance), gaining working knowledge of ISO 27001 and NIST frameworks
- Trained in microservices architecture, Django backend development, and asynchronous task processing with Celery
- Led front-end migration of the Cyber Threat Intelligence Platform to a modern stack, enhancing UI/UX for security analysts
- Built full-stack features for Cybersecurity Awareness LMS, including course dashboards and progress tracking modules
- Implemented JWT authentication, campaign management flows, and reporting dashboards for the Phishing Simulator SaaS platform
- Developed full-stack components and resolved critical CORS issues in the Command & Control Center platform
- Assisted with DevOps tasks including Docker containerization, deployment pipelines, and environment configuration

TryHackMe (tryhackme.com/p/DzDm)

Online

Cybersecurity Training & Labs

Jul 2025 – Present

- Completed hands-on cybersecurity labs covering network security, web application security, and system exploitation
- Developed practical skills in reconnaissance, vulnerability identification, and privilege escalation
- Built proficiency in Linux environments and command-line based security workflows

PortSwigger

Online

Web Security Training

Aug 2025 – Present

- Strengthened expertise in SQL injection, XSS, authentication flaws, and access control vulnerabilities
- Improved structured reconnaissance and web attack surface mapping techniques

TECHNICAL SKILLS

Security:	Web/API Penetration Testing, OWASP Top 10, OWASP WSTG, Vulnerability Assessment, Authentication & Authorization, Linux Administration
Reconnaissance:	Subfinder, Katana, gau, httpx, Nmap
Security Tools:	Caido, Burp Suite, Nuclei, Wireshark, Metasploit, Wazuh, TruffleHog, jsluice
Programming:	Go, Python, C, JavaScript, TypeScript, Bash
Frameworks:	Django, Django REST Framework, Next.js, Laravel
Infrastructure:	Docker, Git, GitHub
Languages:	English, French, Arabic

PROJECTS

Pogo (github.com/Adam-Belkadi/pogo)

Go, 2026

High-Performance TCP Port Scanner

- Built concurrent TCP port scanner using goroutines and worker pools
- Optimized parallel scanning of ports with basic service detection (SSH, HTTP banners)

Secure Distributed System

Go, 2026

Kerberos-inspired Microservices Architecture

- Designed a distributed security architecture consisting of an API Gateway, Auth/KDC, Policy Engine, and centralized audit logging
- Implemented ticket-based authentication with replay protection and RBAC/ABAC authorization policies
- Secured inter-service communication with TLS and implemented routing and rate-limiting controls
- Containerized the system using Docker and Go workspaces

CERTIFICATIONS

Cisco Networking Academy

2026

Introduction to Networks

EDUCATION

University of Science and Technology Houari Boumediene (USTHB)

Bab Ezzouar, Algiers

Cyber Security Engineering, Computer Science Engineering

Expected Graduation: 2027
